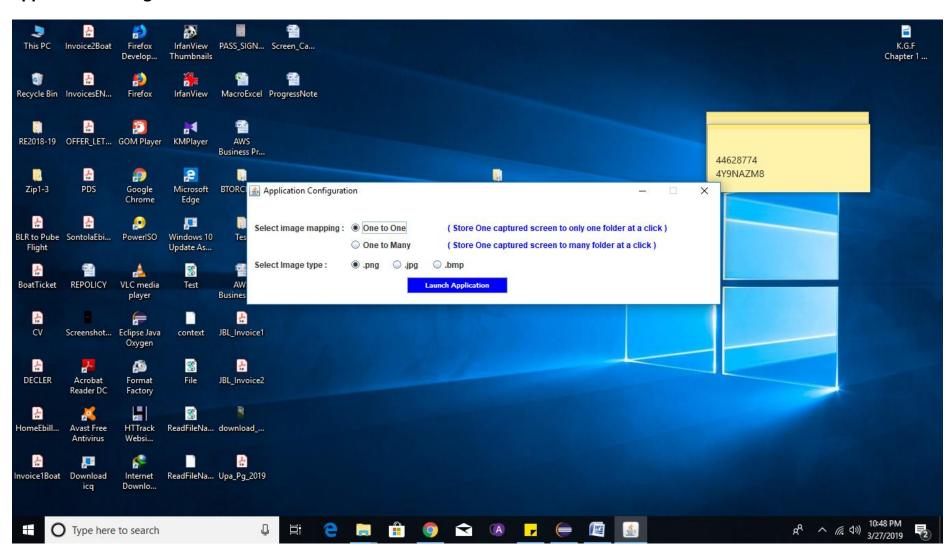

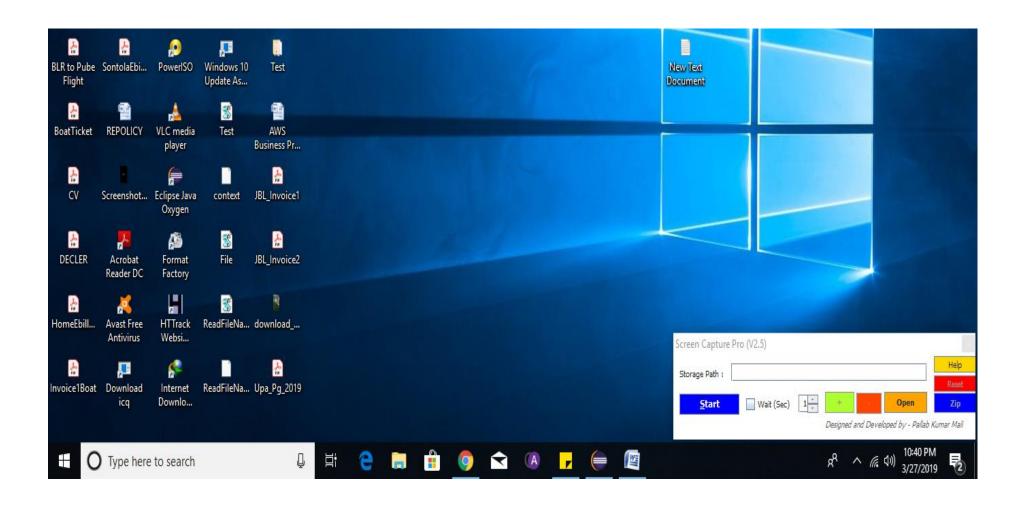

# **Graphic view of detailed steps to use Screen Capture Pro (V2.5)**

## **Application Configuration window:**

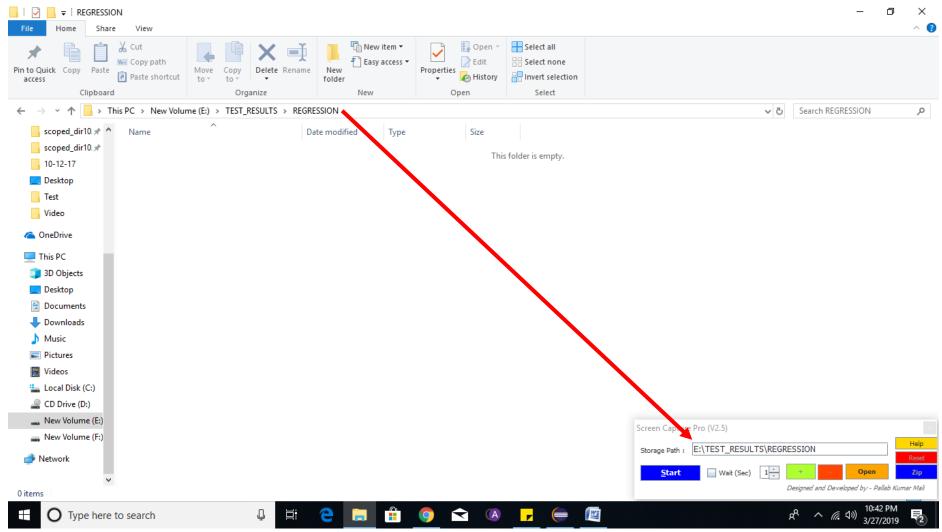

## **After clicking on Launch Application button:**

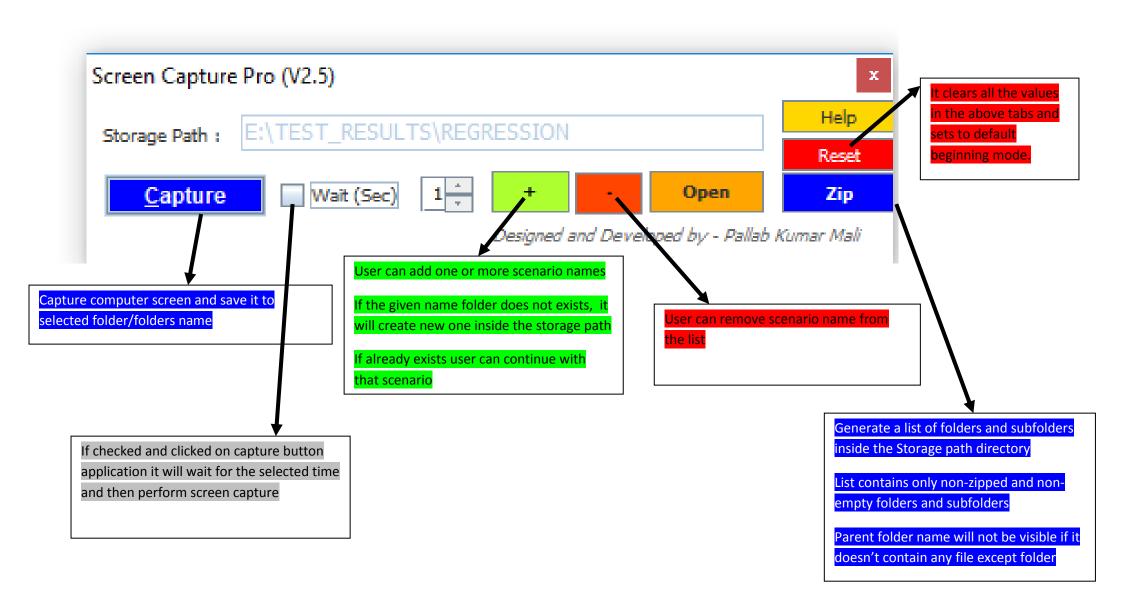

## Provide base storage path in the tab:

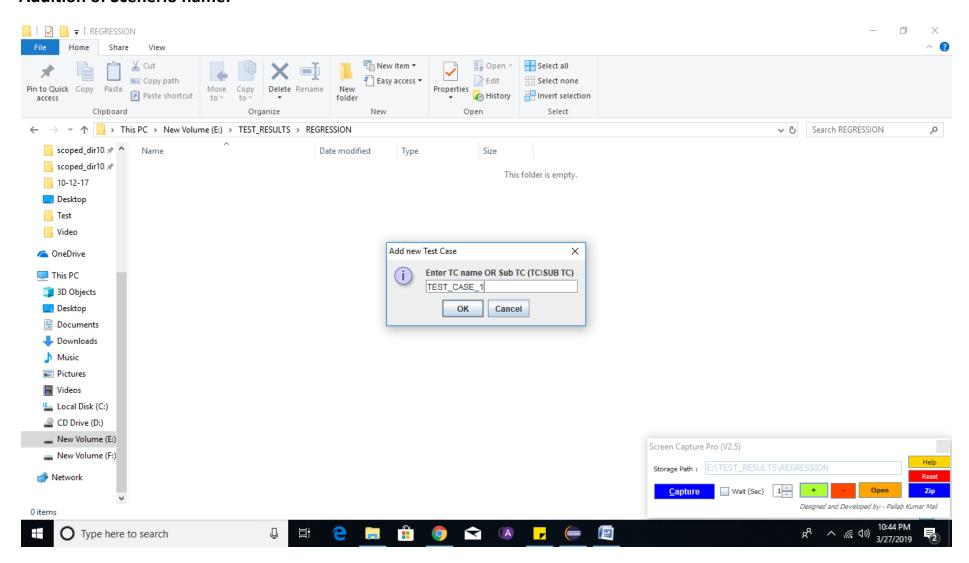

Path may be local system path or remote system path.

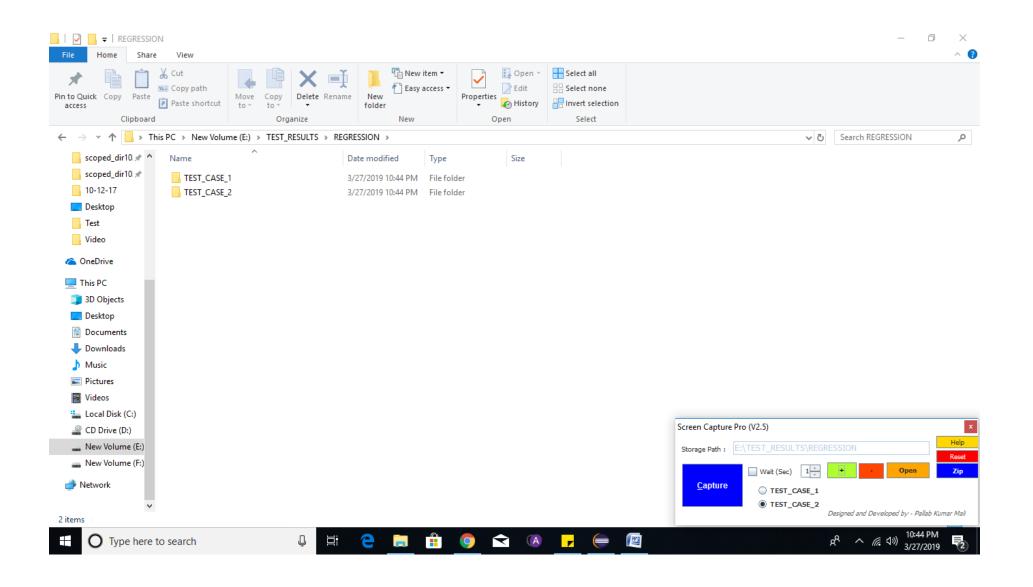

Click on start button -> it will validate the path and enable the application.

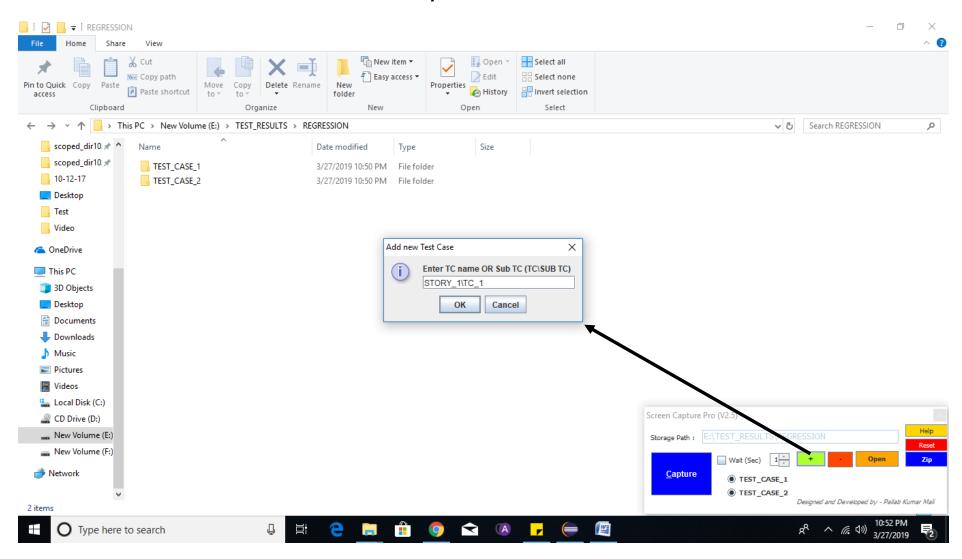

### **Addition of Scenerio name:**

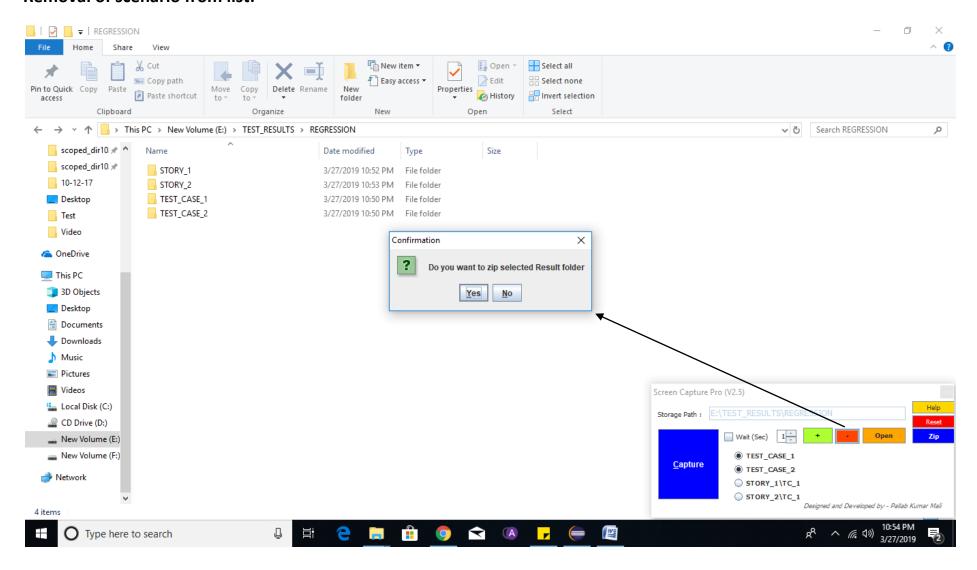

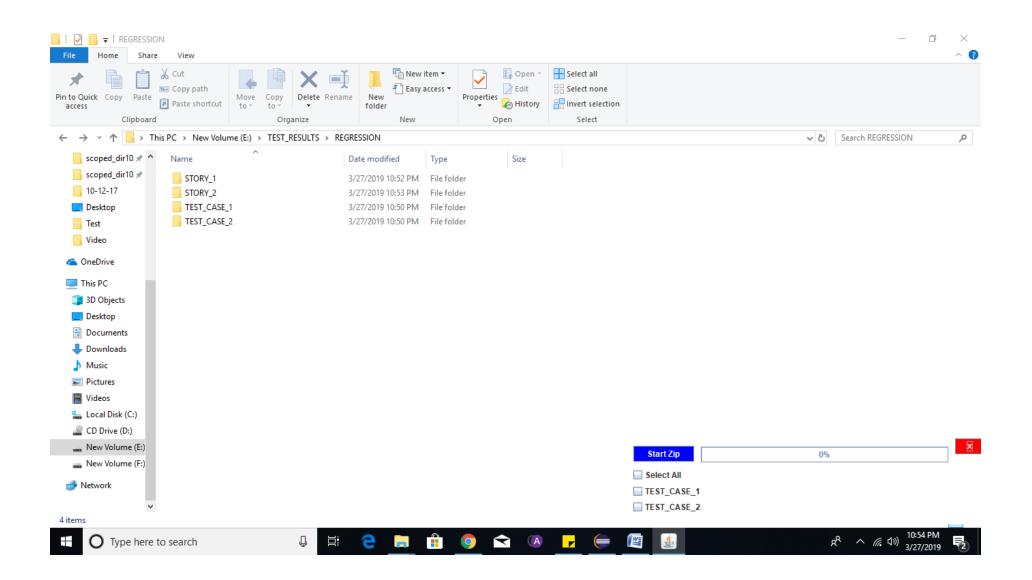

### Addition of different test scenario from different story:

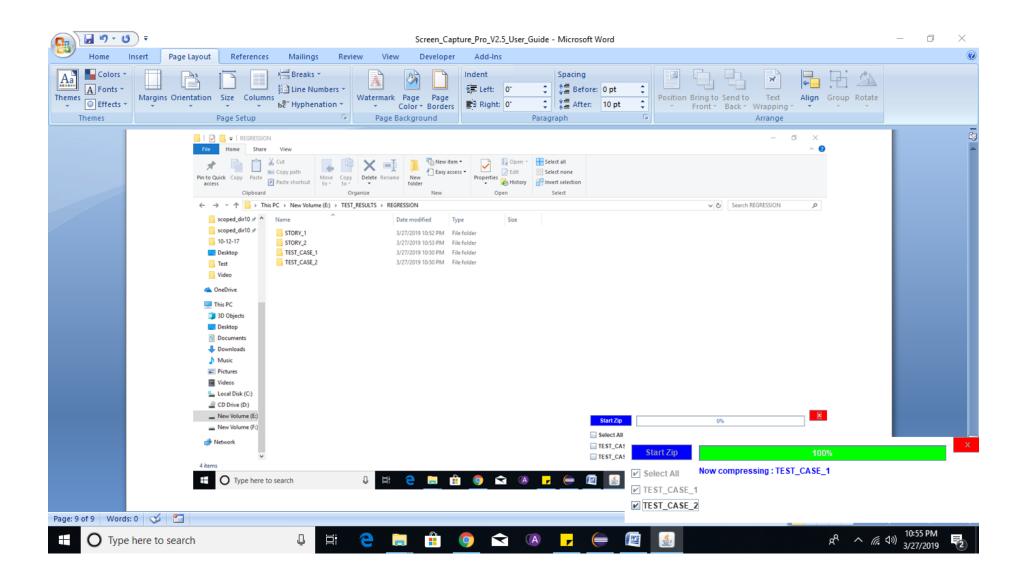

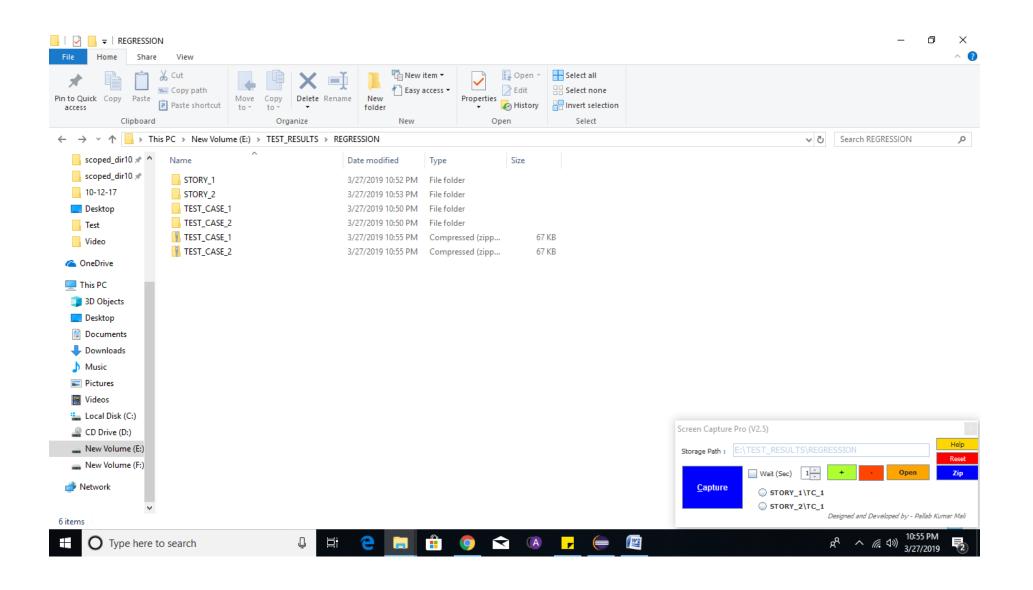

#### Removal of scenario from list:

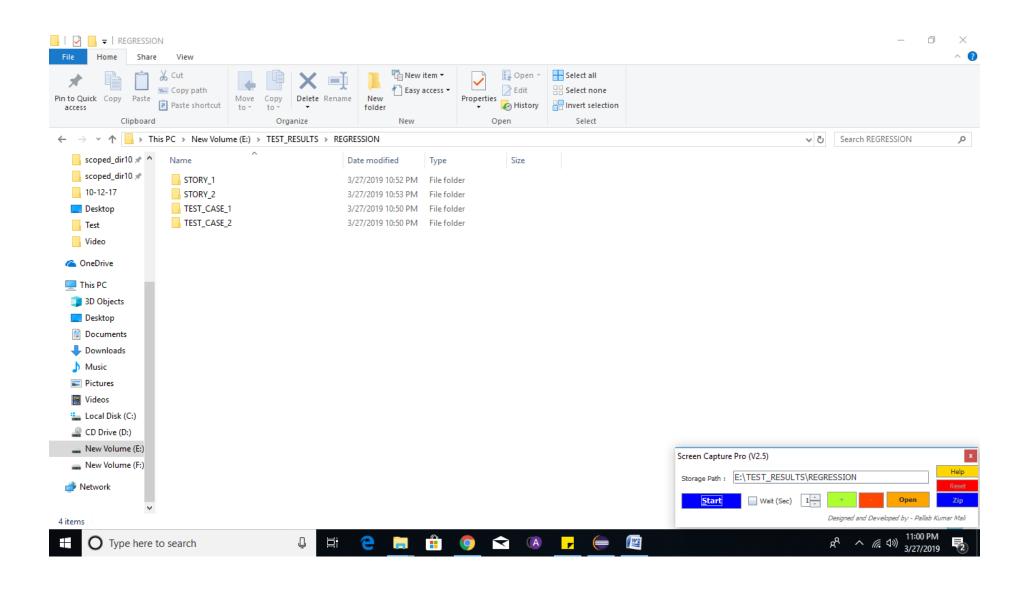

# If you want to zip: (Please Note: It will overwrite if the same folder is already zipped under this directory)

Zip: Zip Button provides the list of folders and subfolders inside the Storage path directory to compress and zip it The List shows only non-zipped and non-empty folders and subfolders

It zips the one that contains any file, not the empty or already zipped folders
